

EXPLANATORY STATEMENT

Program volunteers of the Amputee Peer Support Program

Project ID: 14839

Title: The impact of the Limbs 4 Life Amputee Peer Support Program from the perspective of program participants, peer support volunteers and referring health professionals.

Chief Investigator's name Dr Narelle Warren

Department of anthropology and sociology

Phone: + 61 3 9903 4046

email: Narelle.Warren@monash.edu

You are invited to take part in this study. Please read this Explanatory Statement in full before deciding whether or not to participate in this research. If you would like further information regarding any aspect of this project, you are encouraged to contact the researchers via the phone numbers or email addresses listed above.

What does the research involve?

The Amputee Peer Support Program is an early intervention model and provides a vital link for individuals pre or post amputation (and their families) and / or those who undergo reconstructive surgery for the purpose of prosthetic limb fittings. The program works to provide a holistic “whole of family” approach including support for primary care givers and extended support networks.

The aim of this study is to determine the value of the Amputee Peer Support Program on program participants from the view of peer support program participants, peer support volunteers and referring health professionals.

Participating in the study will involve completing a 15-20 minute survey to ask you question about your views on the program as a volunteer.

At the end of the survey participants from Victoria and South Australia will be asked if they would like to also attend a focus group for a deeper discussion on their experiences and views. The 60 minute focus group will be help in a hospital in South Australia or at the Limbs 4 Life offices in Mt Waverley, Melbourne. This is optional.

Why were you chosen for this research?

You were invited to participate in this study because you volunteer for the Amputee Peer Support Program.

Source of funding

This research project been funded by Limbs 4 Life to cover the salary of two of the investigators.

Consenting to participate in the project and withdrawing from the research

- (i) The consent process involves ticking a box at the start of the survey
- (ii) You (the participant) have the right to withdraw from further participation at any stage. For example, if you tick the box to participate in a focus group you are able to change your mind at any time.
- (iii) At any time during the survey you are able to withdraw by exiting the survey without pressing the submit button. However, it is not possible to withdraw data after pressing the submit button as the project involves the submission of an anonymous survey.
- (iv) The alternative available is to choose not to participate.

Possible benefits and risks to participants

There is no benefit to the current participants and volunteers, however there are possible benefits for future program participants and volunteers as the program will be modified and / or expanded based on the feedback you provide. There is a potential level of inconvenience to you (the participant) as the survey will take 15-20 minutes to complete. There are no reasonably foreseeable risks of harm or side-effects to the potential participants.

Payment

There is no payment or reward offered to participants.

Confidentiality

Anonymity of the data will be maintained as no identifiable data will be provided to the researchers. The results of this research will be publish in a peer review journal and presented at a conference. In addition, a summary of the results will be published in the "Amplified" newsletter. This is the Limbs 4 Life newsletter that is sent to all current and past program participants and volunteers. The focus groups will include the use of a third party transcription service to assist with transcribing the data from the focus groups. The third party transcription service will not be provided with identifiable data and they will be required to sign a confidentiality agreement to maintain confidentiality.

Storage of data

Data will be stored on a password protected database at Limbs 4 Life and only the research team and administrators employed by Limbs 4 Life will have access. Data will be destroyed in accordance with the Monash Data Management Policy.

Results

Participants will be able to access a copy of the results via the "Amplified" newsletter. This is the Limbs 4 Life newsletter that is sent to all current and past program participants and volunteers.

Complaints

Should you have any concerns or complaints about the conduct of the project, you are welcome to contact the Executive Officer, Monash University Human Research Ethics Committee (MUHREC):
